Framework/Libraries: React.js, Node.js, Express.js, Knockout.js, jQuery, Spring, Phoenix

Version Control & CI/CD: GitHub, Jenkins, TFS, Azure DevOps, Jira, Cloud Foundry

Others: Tomcat, Maven, Postman, REST, Wireshark, Hibernate, Servlet, Junit

WORK EXPERIENCE

Philips

Cambridge, MA

Software Development Engineer Coop

Jan 2020-Aug 2020

- Participated in **cloud-based** framework implementation for the project under patient Monitoring that enables predictive analytics for multiple connected healthcare application
- Implemented new features in C# on-prem application, enhanced interactive cloud application using Knockout.js
- Analyzed and fixed 20 security vulnerabilities for both on-prem application and cloud application
- Developed and implemented IAM onboarding scripts in python for the test team
- Composed and improved various documents, including feature spec, deployments, and compliance

State Street Corporation

Boston, MA

Data Analyst Coop

Jun 2016-Dec 2016

- Participated in client data migration projects and improved data quality by over 20% within client administration
- Implemented auto-generate script for weekly reports, improved procedures, and saved five hours of manual work
- Processed an average of ten requests every day, created and corrected data elements on the Salesforce platform

Brown Brothers Harriman

Boston, MA

Reconciliation Analyst Coop

Jun 2017-Dec 2017

- Ensured all daily financial reports are delivered and automated data feeds are properly posted to all reconciliation platform
- Provided detailed commentary to facilitate ledger breaks clearances and escalate to the responsible party for research

ACADEMIC PROJECTS

Inventory Management System

Boston, MA

- Developed a web ERP application to calculating ratios, manipulate CRUD with the GAPP accounting principle applied
- Designed and built schema in MySQL on AWS RDS, applied stored procedures and triggers to facilitate order manipulation
- Created RESTful API using Servlet in Java, used Hibernate for ORM, structured web interface using Bootstrap

NewsBee Forum Web Application

Boston, MA

- Developed a SPA web application for individuals to read news along with peer commentators
- Built the web interface using React.js and Phoenix, implemented SPA with Redux and React-Router
- Structured the relational database (Postgres), implemented server to server external API connection to third-party libraries

Roll Own CDN

Boston, MA

- Built a small content delivery networks(CDN) in python, used multiple AWS EC2 server as original and replica server
- Implemented DNS server dynamically respond to client the best replica server, constructed DNS packet from scratch
- Developed an LRU cache mechanism in HTTP server that effectively fetches content from the origin server
- Ranked top 3 fastest CDN in performance competition in class
